BPO GUIDE:

Antigua & Barbuda

investantiguabarbuda.org

EDUCATED.

With a relatively high GDP per capita, relatively high personal income, a strong education orientation, high literacy and almost 100% English language penetration, Antigua and Barbuda is at the high end of the Caribbean and Latin America market. As such, it is better able to support sophisticated, value-added processes than many other countries.

SERVICE-ORIENTED.

Because of the strong hospitality industry presence in the country and relatively high levels of education, Antigua and Barbuda has a strong service-oriented culture and cultural sensitivity.

FAMILIAR.

Due to its well educated, English-speaking population, with great exposure to the technologies and business practices of the developed world, we believe that Antigua and Barbuda is well equipped to support high value-added business outsourcing applications.

WHY ANTIGUA & BARBUDA?

1. Highly educated labour force.
2. Near 100% literacy and English language penetration.
3. Highly ranked in the region in terms of ease of doing business.
4. Very good international access through the newly expanded The V.C. Bird International Airport.
5. Global connectivity with several ISPs offering high-speed internet access as well as fiber optic options.
6. Culturally sensitive and relatively "americanized" labour pool.
7. Generous tax concessions.
8. No restrictions on foreign ownerships of businesses
9. No restriction on the repatriation of profits or capital gains.
